**Features**

**Relay outputs (Form C) with independent common**

This product has four channels of relay outputs (Form C) with independent common.

Independent common terminal provided per channel, capable of supporting a different external power supply.

The rated load is designed to be a high-capacity of 240VAC 6A, 24VDC 5A per channel.

\* The following ratings need to be satisfied in order to meet CE, UL's requirements. Use the product within these ratings.  
 CE: 240VAC/3A (Resistive), 24VDC/5A (Resistive)  
 UL: 240VAC/6A (Resistive), 24VDC/5A (Resistive)

**Relay isolation**

As bus is isolated from the output interfaces by relays, this product has excellent noise performance.

**Compact design**

Compact design, 25.2 (W)×94.7(D)×124.8 (H), features flexibility in installation.

**Adaptable to a temperature range between -20 and +60°C**

The product is capable of operating in the temperature between -20 and + 60°C. It can be installed in the various environments.

**Installation easy with two pieces of terminal support and DIN rail**

You can install and remove a terminal connector without a screwdriver so that it can shorten the time of the replacement. As the product can be not only mounted on DIN rail, but also is removable along the side rails, replacing is simple and easy as well.

**Equipped with LED for an operation check**

The product has LED for an operation check, which helps you visually confirm the communication status of each interface.

**No electrolytic capacitor battery**

No electrolytic capacitor is used. The Contec is creating the product with a longer life.

This product is a configurable module to provide a function of relay output interface and operates along with the configurable type controller of our CONPROSYS series. It contains four channels of relay outputs (Form C) with independent common.
