## Life expectancy of components

- (1) Backlight --- Display brightness decreases over time with use. The operating life of the backlight (brightness reduced to 50% of original) is 50,000 hours for all models. (Assuming continuous operation at 25 degrees centigrade.)
- (2) Touch panel --- The operating lifetime of the touch panel is at least 1 million touches (as tested by mechanical touching under 300g of force at a rate of two presses per second).
- (3) Power supply --- Expected life is six years for continuous operation at 40°C (when mounted horizontally). However, this life may be reduced depending on the operating temperature (in the case of higher temperatures).

## Touch Panel

This equipment has a touch panel that enables keyboard-less, mouse-less operations by communication with the host computer using the RS-232C cable.

Data input at the touch panel is processed by the touch panel controller and passed to the host PC via the serial port on the CPU in the controller.

Before the touch panel can be used, touch panel driver software must be installed. Note that the driver software is not bundled with this product. Purchase the one separately or download it from the CONTEC's web site.

For further details, refer to the READ\_ME file for each driver.
