Proprietary Development Technologies Designed for a Wide Spectrum of Industries

Contec designs, develops and manufactures highly reliable, long-life and rugged industrial computers. Leveraging our expertise in the Factory Automation (FA) industry has allowed us to expand our business and quality product offerings to the growing Information and Communication Technology fields, including digital signage, healthcare, and energy.

Internet of Things Device Business

Offering Multi-Faceted I/O Product Lineup to Meet Your Needs

We develop, manufacture and sell I/O boards used in various types of signal processing, which are essential for measurement control systems using PCs. We also provide the equipment and software needed in the rapidly growing area of M2M/IoT, enabling the remote monitoring of infrastructure facilities and preventive maintenance of plant facilities.

IoT Solution Business

Offering IoT Solutions That Combine Our Three Core Technologies with Software and Services

Cloud Data

Contec provides IoT solutions targeting a variety of fields, including factory automation, social infrastructure, energy and services. For example, our solutions play a role in data analysis and preventive maintenance, through the gathering of real-time data on the operational status of equipment in various locations and the aggregation of such data in the cloud via the Internet.

Contec's Global Information Network

Integrating Production, Development and Marketing Information in Real Time in Different Countries

In response to the expansion of business in global markets, we are deploying leading-edge ICT environments and promoting stronger liaisons with corporate partners in various countries. Through backbone information management and CRM systems that support customers and our own solutions, we share and utilize many types of information.

Seamlessly sharing development, production and sales information across multiple countries allows us to meet diverse customer needs promptly.
